This will be a basic tracking training course focused on law enforcement officer initial response and investigation of possible criminal misconduct incidents and crime scenes.

There are NO prerequisites for this training presentation. This tracking course is open to all persons with tracking interests regardless of previous experience or training. All tracking students will be provided training at an appropriate level for their development and upward progress.

Course Content: This will be a 46 hour course beginning at 8:00 am Monday October 3, 2016 with registration and lecture including power point presentation to provide Novice and Basic tracker understanding of training methodology, techniques and procedures. The presentation supports field training by providing student understanding of training methods, manner and objectives. "Tracking" is a first response primary search resource used to verify witness statements, establish the "PLS", direction of subject travel and following the physical evidence to the missing person. Field training will allow "student tracking team" experimentation and "hands-on" practice of fundamental tracking techniques. Novice students will progress from initial identifying a print, to "step-by-step" every track concept of following an identified sign line and practical tracking team response.

This is a "skill development" training program for Apprentice and Journeyman Tracker Students. Students at these levels have acquired Basic Tracker understanding and will be introduced to practical tracking techniques and applications necessary to become a viable resource for SAR and law enforcement initial response and investigations. Students at all training levels will be individually challenged with additional advanced tracking concepts and techniques. Journeyman Tracker students will be provided advanced training objectives working with Novice and Apprentice students and separately in simulated actual SAR and law enforcement mission scenarios.

Student Needs: Students should be physically fit and equipped for SAR & law enforcement field response. Field practice will continue during any inclement weather, students should be properly prepared with wet/dry, cold/hot weather gear. Knee pads may be helpful. Students need to bring a pen/pencil, note pad, small measuring tape, 5/8 inch doweling or similar, 36 to 40 inches long, with three rubber bands to use as a tracking stick and a two or three cell flashlight.
